The Murco Gas Sensor (MGS) is a state-of-the-art fixed gas detector which can detect a wide range of different gases. The sensors can be used on a stand-alone basis or integrated into Controls or Building Management Systems (BMS) using its digital or analog output.

It is a high-specification product available at a competitive price and it offers customers absolute confidence that both safety and compliance requirements are met or exceeded. It is ideal for:

- new buildings/areas that require continuous monitoring with high tech gas sensor transmitters
- customers who want to add gas detection solutions to an existing system.

**Applications**

Typical applications include:

**Refrigerant gases** all refrigerant gases including: Ammonia, Carbon Dioxide, Hydrocarbons, Halocarbons - HFCs, HCFCs, CFCs.

**Combustible gases** such as: Methane, LPG, Propane, Butane, and Hydrogen

**Toxic gases** such as: Carbon Dioxide and Ammonia in refrigeration, Hydrogen Sulphide in sewage treatment and Carbon Monoxide in underground car parks

**Volatile Organic Compounds** such as: Acetone, Benzene, Carbon Tetrachloride, Chloroform, Ethanol, Toluene, Trichloroethylene.

**Control Panels Available**

Murco also supply Control Panels if you wish to have a stand-alone gas detection system. Models are available with 2, 4, 6... and up to 16 channels using the ST-MON panel.

**Benefits**

**Cost Effective Detection**

Murco is committed to delivering highly competitive quality products and solutions. The early detection of gases afforded by Murco Gas Sensors minimises the cost associated with leaks.

**Legal Compliance**

The MGS series enables compliance with all the necessary regulatory, legal and Insurance requirements.

**Environmental Considerations**

The early detection of gas minimises emissions. Also Murco Gas Sensors enable compliance with all relevant environmental legislation and the product itself is fully recyclable.

**Better Performance**

Because Murco Gas Sensors offer reliable, real-time and continuous monitoring, you can avoid all the usual problems that occur with aspirated systems as a result of blocked filters, damaged tubes and delayed sample analysis.

**Tailored to Task, Tailored to Gas**

Each sensor can be individually specified to meet your requirements in terms of the type of gas to be detected, the range and alarm level. You select the output preferred to integrate the sensor into your system.

**Increased Connectivity**

The MGS can integrate with most Control and Building Management Systems (including the ST-MON and MGD series panels), using one of it's linearised analogue outputs and digital (relay) output.

Whatever your business and whatever your budget, Murco has a gas detection system to suit you.

### Optionnal Housings

- **Standard**
  - IP66
  - IP55/ Low Temp
  - IP56* Exd

- **Remote Exd/Head**
  - Vent Pipe Indoor
  - Vent Pipe Outdoor
  - Airflow / Duct Mount Indoor
  - Airflow / Duct Mount Outdoor
  - Decorative Face Plate (For Remote Sensor)*

### Typical Gases/Ranges we detect:

#### ELECTROCHEMICAL

- **Ammonia** : NH₃
- **Carbon Monoxide** : CO
- **Chlorine** : Cl₂
- **Chlorine Dioxide** : ClO₂
- **Ethylene Oxide** : C₂H₄O
- **Ethylene** : C₂H₄
- **Hydrazine** : N₂H₄
- **Silane - Hydride** : SiH₄
- **Hydrogen** : H₂
- **Hydrogen Chloride** : HCl
- **Hydrogen Cyanide** : HCN
- **Hydrogen Sulphide** : H₂S
- **Nitric Oxide** : NO
- **Nitrogen Dioxide** : NO₂
- **Oxygen** : O₂
- **Ozone** : O₃
- **Phosgene** : COCl₂
- **Phosphine** : PH₃
- **Sulphur Dioxide** : SO₂

#### INFRARED

- **Carbon Dioxide** : CO₂
- **Carbon Monoxide** :
  - Standard model 0-10,000 ppm, (0-1% vol)
  - Special request 0-1,000 ppm, 0-2,000 ppm, 0-5%, 0-10%

#### SEMICONDUCTOR

- **HFC's - typical examples** : R134a, R404A, R407, R410A, R507
- **HCFC's - typical examples** : R22
- **CFC's - typical examples** : R11, R12
- **Hydrocarbons - typical examples** : Methane (Natural gas), Propane, Butane, LPG, Isobutane, Ethylene
- **Ammonia** : NH₃
- **Hydrogen** : H₂
- **VOC's - typical examples** : Acetone, Chloroform, Ethanol, Methanol, Methyl and Methylene Chloride, Ethyl and Ethylene Chloride
