

# Gas filters

## AG1.. series

These filters are widely used for the protection of control devices, pressure regulators, meters and systems requiring a high degree of filtration. They can be used with all types of Natural Gas, LPG, or non-corrosive gases.

The large surface of the cartridge ensures a high degree of separation of both dust and solid particles, minimising the maintenance required on all equipment installed downstream of the filter.

**AG130-131**

**AG132-141**

Code	Use	Max pressure (bar)	Connections
AG130	Domestic boiler filter, threaded	10 Bar	1/2"
AG131	Domestic boiler filter, threaded	10 Bar	3/4"
AG132	Line filter, threaded	10 Bar	1/2"
AG133	Line filter, threaded	10 Bar	3/4"
AG134	Line filter, threaded	10 Bar	1"
AG135	Line filter, threaded	10 Bar	1 1/4"
AG136	Line filter, threaded	10 Bar	1 1/2"
AG137	Line filter, threaded	10 Bar	2"
AG138	Total closing regulator, flanged	10 Bar	DN65
AG139	Total closing regulator, flanged	10 Bar	DN80
AG140	Total closing regulator, flanged	10 Bar	DN100
AG141	Total closing regulator, flanged	2 Bar	DN150
