

# Central gas detection unit

## CTM11

Central gas detection unit for Methane or LPG, for use with remote sensor

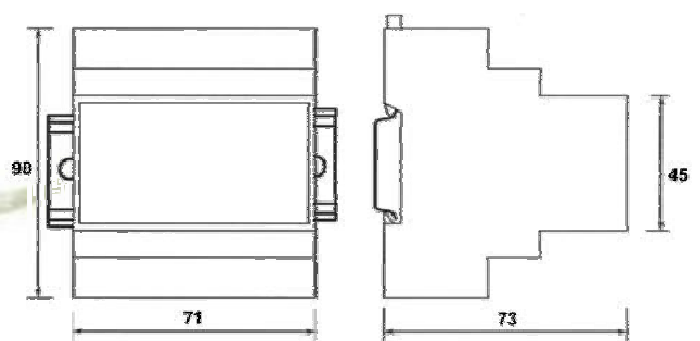

The CTM gas detector can be connected to one remote catalytic sensor for flammable gases calibrated for Methane or LPG. It's normally mains powered but can also be connected to a 12Vdc external power supply.

The instrument is supplied with sealed-type output relays, normally activated and with tension-free change over contacts.

CTM11

- Power supply: 230Vac - 3.5VA
- Rating: IP40
- First relay intervention: 10% LEL
- Second relay intervention: 20% LEL
- Contacts rating: 230Vac 3A SPDT
- DIN rail mounted
