SINAMICS V20

The cost-effective, reliable and easy-to-use inverter
for basic applications

siemens.com/sinamics-v20

Answers for industry.

SINAMICS V20

The perfect solution for basic applications

SINAMICS V20, the versatile inverter for basic demands

Today, in an increasing number of applications in plant and machinery construction, individual automation and drive solutions are demanded that automate simple motion sequences with low associated requirements.

With its compact SINAMICS V20, the basic performance inverter, Siemens offers a simple and cost-effective drive solution for these types of applications. SINAMICS V20 sets itself apart with its quick commissioning times, ease of operation, robustness and cost-efficiency.

With four frame sizes, it covers a power range extending from 0.12 kW up to 15 kW (1/6 hp up to 20 hp).

Minimize your costs

Engineering, commissioning and operating costs as well as those in operation must be kept as low as possible. You have precisely the right answer with our SINAMICS V20. To increase energy efficiency, the inverter is equipped with a control technique to achieve optimum energy efficiency through automatic flux reduction. Not only this, it displays the actual energy consumption and has additional, integrated energy-saving functions. This allows energy consumption to be slashed drastically.

Highlights

Easy to install

- Push-through and wall mounting – side-by-side possible for both
- USS and Modbus RTU at terminals
- Integrated braking chopper for 7.5 kW to 15 kW (10 hp up to 20 hp)

Easy to use

- Parameter loading without power supply
- Integrated application and connection macros
- Keep Running Mode for uninterrupted operation
- Wide voltage range, advanced cooling design and coated PCBs increase robustness

Easy to save money

- ECO mode for V/f, V²/f
- Hibernation mode
- DC coupling

Power range	0.12 kW to 15 kW (1/6 hp up to 20 hp)
Voltage range	1AC 200 V ... 240 V (+/-10 %) 3AC 380 V ... 480 V (+10 % / -15 %)
Control modes	V/f V ² /f FCC V/f multi-point

Typical applications

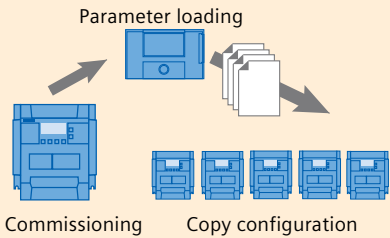

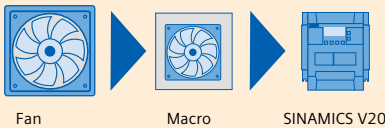

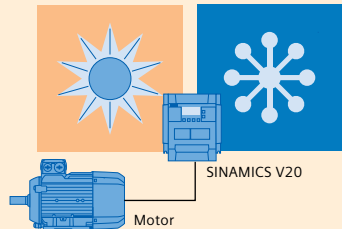

Pumping, ventilating and compressing		
 	<ul style="list-style-type: none"> • Centrifugal pumps • Radial/axial fans • Compressors 	<p>Additional advantages:</p> <ul style="list-style-type: none"> • High availability through automatic restart and flying restart after power failures • Broken belt detection by monitoring the load torque • Pump protection against cavitation • Hammer start and blockage clearing modes for clogged pumps • PID controller for process values (e.g. temperature, pressure, level, flow) • PID auto tuning to optimize controller parameters • Hibernation mode stops the motor when demand is low • Motor staging extends the flow range by adding two more fixed-speed drives (cascade) • Frost and condensation protection prevents moisture in motors under extreme environmental conditions
Moving		
 	<ul style="list-style-type: none"> • Belt conveyors • Roller conveyors • Chain conveyors 	<p>Additional advantages:</p> <ul style="list-style-type: none"> • Soft, jerk-free acceleration reduces the stress on the gear units, bearings, drums and rollers • Super torque start for conveyor belts with high breakaway torque • Dynamic behavior by using braking resistor or DC braking • Direct control of mechanical holding brake • Broken belt detection by monitoring the load torque
Processing		
 	<ul style="list-style-type: none"> • Single drives in the process industry such as mills, mixers, kneaders, crushers, agitators, centrifuges • Main drives in machines with mechanically coupled axes such as ring spinning machines, braiding machines for textile, ropes and wire 	<p>Additional advantages:</p> <ul style="list-style-type: none"> • Frost and condensation protection prevents moisture in motors under extreme environmental conditions • Higher productivity with uninterrupted production due to Keep Running Mode • Exchange of regenerative energy via the DC link • Super torque start for machines with a high breakaway torque

Easy to install

Installation		
<p>Side-by-side mounting No space required</p> <p>Wall mounting Cooling</p> <p>Push-through mounting Cooling</p>	<p>SINAMICS V20 feature</p> <p>Compact design, side-by-side mounting and flexible device installation for both wall mounting and push-through mounting.</p> <p>Operation without additional option modules possible.</p>	<p>Your benefits</p> <ul style="list-style-type: none"> • Compact installation allows smaller cabinets to be used • Push-through mounting allows the cabinet to be cooled more easily • Can be run “out-of-the-box” without other options • Basic operator actions at a built-in BOP (Basic Operator Panel)
Communication		
<p>Siemens products</p> <p>Other products</p> <p>Standard library</p> <p>USS</p> <p>Modbus</p> <p>SINAMICS V20</p> <p>SINAMICS V20</p>	<p>SINAMICS V20 feature</p> <p>The communication port is available at the terminals. The preset parameters of the USS and Modbus RTU are defined in the connection macro.</p>	<p>Your benefits</p> <ul style="list-style-type: none"> • Easy integration into existing systems • Easy integration into micro automation systems • Easier commissioning through standard libraries and connection macros
Braking module		
<p>SINAMICS V20</p> <p>Motor</p> <p>Braking module</p> <p>Resistor</p>	<p>SINAMICS V20 feature</p> <p>The dynamic energy is dissipated as heat in a braking resistor with an adjustable duty cycle of between 5 % and 100 %.</p>	<p>Your benefits</p> <ul style="list-style-type: none"> • Possible to use dynamic braking to increase braking performance • Inverters ≥ 7.5 kW have an integrated braking module. In this case, the braking resistor can be directly connected.

Easy to use

Parameter cloning		
	SINAMICS V20 feature	Your benefits
	Parameter settings can be easily transferred from one unit to another using the BOP (Basic Operator Panel) interface – or even without power supply by using the parameter loader.	<ul style="list-style-type: none"> • Less technical support required • Short commissioning time • The product is delivered to the customer already preset
Macro approach		
	SINAMICS V20 feature	Your benefits
	Connection and application macros to simplify I/O configuration and make the appropriate settings.	<ul style="list-style-type: none"> • Shorter training and commissioning time • Integrated and optimized application setting • Simple connection and application macros can be selected instead of configuring long complicated parameter lists • Errors caused by wrong parameter settings can be avoided
Keep Running Mode		
	SINAMICS V20 feature	Your benefits
	The function provides higher productivity in production by automatic adaptation in the case of unstable line supplies.	<ul style="list-style-type: none"> • Stable operation under difficult line supply conditions • Higher productivity through prevention of interruptions of the production line • Adaptation to application-relevant reactions through flexible definition in case of fault/alarm
Robustness		
	SINAMICS V20 feature	Your benefits
	Wider voltage range, better cooling design and coated PCB increase robustness of the drive in difficult environments.	<ul style="list-style-type: none"> • Operation possible when the line supply voltage fluctuates • Reliable operation for line voltages: <ul style="list-style-type: none"> – 1AC 200 V ... 240 V (–10 % / +10 %) – 3AC 380 V ... 480 V (–15 % / +10 %) • Operation up to an ambient temperature of 60 °C

Easy to save money

Energy reduction during operation

SINAMICS V20 feature

Integrated ECO mode for V/f and V²/f automatically adapts the flux to save energy. The energy consumption can be shown in kWh, CO₂ or even in the local currency.

Your benefits

- Energy saving during low dynamic load cycles
- If the setpoint changes, the ECO mode is automatically deactivated
- Tells end users the actual energy that has been saved

Energy reduction during operation – DC coupling

SINAMICS V20 feature

Applications that use SINAMICS V20 drives with the same power rating can share a common DC bus to reuse the regenerative energy.

Your benefits

- Generate and save energy in applications that use coupled motors
- Pairs of identical inverters can optimally share resources
- Reduce the need for dynamic braking and external components

Energy reduction during standby – hibernation mode

SINAMICS V20 feature

Inverter and motor only operate when the plant or machine requires them to. Hibernation mode will be activated automatically when the frequency demand or the feedback from a sensor drops below a specific threshold.

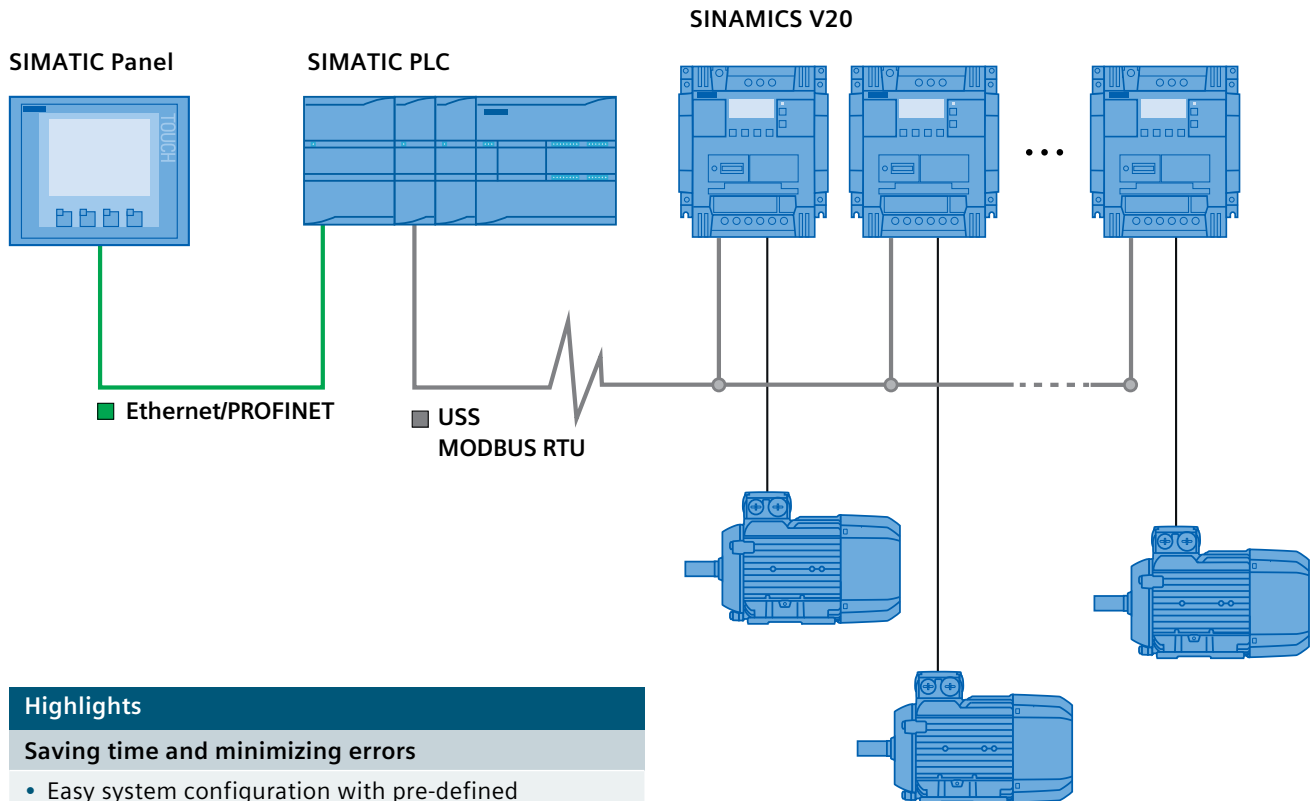

Your benefits

- Smart hibernation saves energy
- Extended lifetime of motor
- Reduced pump wear at low speed
- Less time to program PLC code for pump/fan applications (PLC)

* Application and machine-type dependent.

Easy automation system

Combining SIMATIC PLC with SINAMICS V20

Highlights

Saving time and minimizing errors

- Easy system configuration with pre-defined macros in the inverter and pre-built Totally Integrated Automation Portal function blocks for quick connection to SIMATIC S7-1200**
- One cable to connect SINAMICS V20 with USS or MODBUS RTU
- Integrated communication interface

** Application example with function blocks can be downloaded from Siemens Industry Online Support under:

Industry Services

Your machines and plants can do more

Siemens supports its customers worldwide with Services for products, systems and applications throughout the entire lifecycle of machines and plants. Customers benefit not only from our holistic service portfolio, but also from our extensive knowledge of technologies and products, as well as the industry competence of Siemens experts.

With the product-related services in particular, the focus is always on ensuring maximum plant availability in daily operation. The key here is expert consulting and support directly from the manufacturer of the drive and automation technology being used.

As a result downtimes are reduced and resource utilization is optimized. The result is greater productivity, flexibility and efficiency at a lower overall cost.

Discover all the advantages of the Industry Services portfolio at [siemens.com/industry-services](https://www.siemens.com/industry-services)

SINAMICS V20 service

SINAMICS V20 service is integrated into our well-established global model.

- Global hotline support
- Comprehensive service network of factory-trained repair specialists
- Multiple language web-based support and FAQs

Online Support

The comprehensive online information platform supports you in all aspects of our service & support at any time and from any location in the world.

Simple entry using the DT Configurator

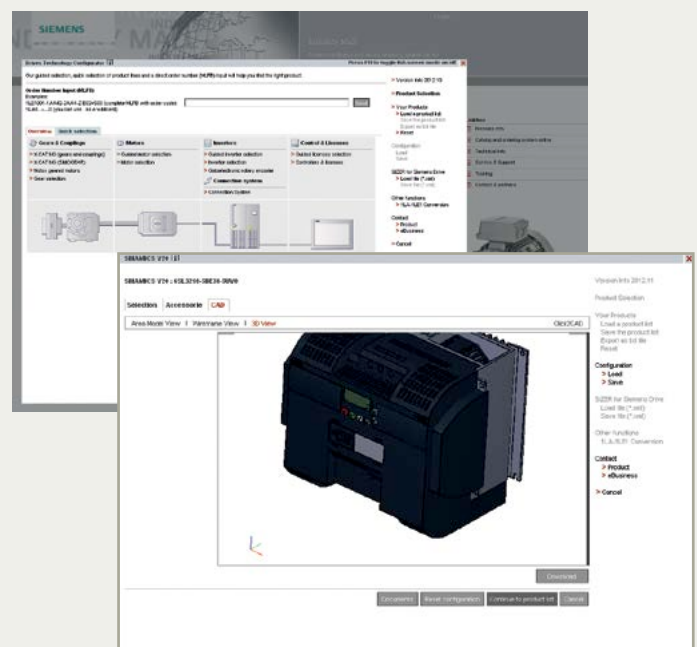

The DT Configurator supports you with:

- Selecting the drive based on the application
- The subsequent ordering process

DT Configurator supplies you with

- A drive that is optimally tailored to your requirements
- 2D/3D models
- Operating instructions
- Data sheets

You can directly order the selected components through the Industry Mall – the Siemens e-commerce website – and without having to duplicate entries. In order to avoid making ordering mistakes, the order number is checked to ensure that it is correct. [siemens.com/dt-configurator](https://www.siemens.com/dt-configurator)
